

When the Modern Office replaced the “old office” the old office furniture went with it. Modern office furniture reflects the needs of young, dynamic, and creative businesses. Today businesses, trying to distinguish themselves from others, often use their office environment, workspaces and communication systems as key tools in distinguishing themselves from their competitors.

Modern office furniture products need to be flexible, ergonomic, elegant, and most importantly, comfortable and functional. To maximize performance and productivity, today’s manufacturers are incessantly designing new modern office furniture pieces that can keep up with our rapidly changing world. MAiSPACE is leading the field with its unique designs and, as might be expected, is the fastest growing office furniture company. MAiSPACE provides a variety of modern office furniture systems that are sleek, elegant, exceptionally affordable, and immensely versatile. Innovative, functional, and individually-centric MAiSPACE modern office furniture products provide all of the features and benefits of expensive alternatives, proving that style, elegance, and function can come at an affordable price.

The modern office is warm, friendly, comfortable, and functional and it’s eco-friendly. Our wood furniture products come from sustainable forests. Another advantage of wood furniture is its natural aroma; definitely the air that you breathe is much healthier and it’s natural in an environment of natural wood versus other non-natural materials. A study recently revealed that some of the components used in office furnishing systems were sources of toxic compounds.

MAiSPACE also offers safe and recycled materials. Our modern office furniture products are fiberglass free. Unlike many office systems, which are filled with fiberglass that doesn’t break down in landfills, we use post-consumer polyethylene terephthalate (PET) from ground up soda bottles. We hope other manufacturers will share our concerns and follow our lead. Due to the large number of plastic containers being discarded, much of this material goes unused. We are very happy to find a use for it that makes sense from every perspective.

Modern office is designed with simplicity and functionality in mind. Ergonomic chairs, fixed, foldable, and transitional conference tables. Based on this philosophy, MAiSPACE takes innovation and interior office design to the next level. MAiSPACE redefines the rules about what the office should and could look like. MAiSPACE introduces a new lines of modern office furniture that suits the needs of the creative minds of today’s thriving businesses. MAiSPACE designs office systems and furniture that help workers to work more effectively and productively.

In today’s corporate world, space is always a central issue. As such, today’s interior design is all about space planning and utilization, and efficiency. What we need is more breathing room in today’s modern offices. The office space cannot be too confining. The modern office workstation can be easily taken apart and then re-assembled to meet your ever changing workspace needs. We offer modern office furniture that allows you to maximize comfort in a minimal work space.

At MAiSPACE, we also help you reconfigure an office floor plan in hours without disrupting the entire local area network. Reconfigurable, ready-to-assemble frames equipped with self aligning connectors simplify moving elements into and throughout the building reducing installation costs.

Modern office furniture is about using the latest technology to your advantage. We are here to bring order out of chaos, because we know in today's corporate world it's all efficiency, productivity ... but also the look and feel of the workplace. MAiSPACE and Morspace, our two signature product lines, are based on the size, reach, movements of the users. User-friendly components, such as cascade edge worksurfaces and adjustable height, sit/stand keyboard platforms for computer intensive environments provide plenty of usable and breathable space and help manage information. We also take pride in cable management. Frames provide unobstructed cable pathways top to bottom. Cable runs are laid in behind lift-off panel segments, not bundled and fished through structural elements. Off-modular design allows flexibility in workspace size, configuration and in locating bins, shelves, and divider panels.

At MAiSPACE, we are changing the way people think of office and office furniture. Modern office furniture speaks volumes about your business ... functionality, productivity, your attitudes and image. We also know that the way your office is structured and organized can communicate the message beyond the company ... at MAiSPACE, we understand this and are here to help you meet all of the requirements and objectives of your modern office.
