

The old office is dead; so is old office furniture. Modern office furniture is revolutionary; it reflects the needs and aspirations of young, dynamic, and creative businesses. Today businesses try to distinguish themselves by creating something unique about themselves; a look, a signature, an experience that helps tell their story. Today's office furniture manufacturers are working hard to introduce new products that will accommodate the changing needs of the thriving businesses.

Importantly, MAiSPACE is leading its competitors with its quality and easy-to-install-and-reconfigure modular and ergonomic office furniture products that conform to the highest industry and environmental standards. At MAiSPACE, we take pride in all our products, because as the manufacturer, we apply strict controls throughout the manufacturing process guaranteeing you that the most stringent industry standards are being met. We are committed to the environment, consumer safety and health ... yes, we are GREEN! We produce 100% environmentally safe, environmentally friendly, recycled, and chemical and fiber glass free office furniture products.

Commitment to environment, consumer safety and health

At MAiSPACE, we believe in creating the right working environment with respect to the environment. We produce 100% environmentally safe, eco-friendly, chemical and fiber glass-free office furniture products that do not emit chemical odors keeping the air you breathe healthy. We apply strict controls throughout the manufacturing process guaranteeing you that the most stringent standards are being met.

MAiSPACE offers safe and recycled materials. Unlike most office systems, which are filled with fiberglass that doesn't break down in landfills and is a source of airborne glass, we use post-consumer polyethylene terephthalate (PET) from ground up soda bottles. We hope other manufacturers will follow our lead. Due to the large number of plastic containers being discarded, much of this material goes unused. We've found a use for it that makes sense from every perspective. At MAiSPACE, we are happy to find a use for it that makes sense from every perspective, says MD Kim-Company's Vice President of Manufacturing.

We also produce low impact products through low impact processes. For one of our lines, MAiOFFICE, we use a state of the art thermo-forming manufacturing process. A poly-acrylic 5 Step UV finishing process results in a durable finish that does not fade in daylight exposure. Most importantly, the process is environmentally friendly, while being stain and solvent resistant. "It is simply the most durable and elegant finish available," says MAiSPACE co-founder Mark Bassil.

Ergonomic design

At MAiSPACE, we make ergonomics our top priority and constantly apply the principles of good ergonomic design to make every workstation ergonomically friendly. As an office furniture manufacturer, we know that our role is not that of the ergonomist, however, but as a solution provider. Of primary importance in purchasing ergonomic office furniture is to identify the ergonomic risk factors prevalent in your facility. As

such, at MAiSPACE, we work closely with our clients to identify those ergonomic issues that can be reduced or eliminated with proper office furniture. As a research driven company, we are constantly evaluating and updating product options to accommodate changes in technology.

Increasing differentiation of the workforce leads manufacturers to offer workstations that meet the requirements of functional and ergonomic performance. Ergonomic workstations are created to enhance employee productivity and performance through increased alertness, and improved health and comfort. For instance, MAiCHAIR, MAiSPACE's revolutionary ergonomic chair, incorporates comfort, style and technology at a great value. MAiCHAIR comes in a variety of colors, styles, and fabrics. It's designed to adapt to your motion and it's easy to adjust with one simple mechanism. It will help you to find the most comfortable position by conforming to the spine and providing critical support in the lumbar region. Choosing the right chair can actually improve your life. How long do you sit in your chair every day? MAiCHAIR is certainly the "must have" product of today's and tomorrow's office.

Comfort, style, functionality, and efficiency

The philosophy behind MAiSPACE's office systems furniture is increased flexibility and functionality with a completely movable office where floor plans could easily be modified and reconfigured. At MAiSPACE, we create functional workstations that perfectly meet the needs of individuals and businesses at the same time. We are constantly working to elevate productivity and performance of the workers and employees. We adopt an approach to interior office design that is based on the principles of efficiency, harmony, aesthetics, and functionality. We offer new office furniture products that are flexible, ergonomic, stylish, elegant and functional. We customize furniture according to your work habits and create space-saving workstations.

MAiSPACE offers a variety of new office furniture systems that are finely crafted, extremely stylish, exceptionally affordable, and exceedingly versatile; all designed to meet your needs. It is simply great products at great prices. For instance, MAiCHAIR, MAiSPACE's revolutionary ergonomic chair, incorporates comfort, style and technology at a great value. MAiCHAIR comes in a variety of colors, styles, and fabrics. It's designed to adapt to your motion and easy to adjust with one easy adjustment mechanism. It will help you to find the most comfortable position by conforming to the spine and providing critical support in the lumbar region.
