

To work right, you have to sit right. Today, the majority of individual employees spend most of their day sitting. Increasing differentiation in the workplace leads manufacturers to offer workstations that meet the key requirements of functional and ergonomic performance. Ergonomic workstations are created to enhance employee productivity and performance through increased alertness, and improved health and comfort.

Studies by leading health and safety experts have repeatedly emphasized the health and productivity benefit of changing one's work posture from time to time during the day. Height adjustable ergonomic office desk and chairs not only increase comfort, but also supports your commitment to providing a safe, comfortable and productive environment that is responsive to individual needs. In today's increasingly diverse competitive market, a more ergonomically sound workstation is one of the essential ways to attract and retain employees.

Every employee in your office has a unique body shape, size and set of working preferences, which may even change frequently. Fortunately, MAiSPACE offers a broad-spectrum of executive ergonomic chairs, ergonomic task desks, ergonomic computer desk chairs with functionality, comfort, and style for every variation of human nature and posture.

At MAiSPACE, we emphasize ergonomics and we consistently apply the principles of good ergonomic design to make every workstation ergonomically optimized. As a leading office furniture manufacturer, our role is not that of the ergonomist, however, but that of solution provider. Of primary importance in purchasing ergonomic office furniture is to identify the ergonomic risk factors prevalent in your facility. As such, at MAiSPACE, we work closely with our clients to identify those ergonomic issues that can be addressed most effectively with well-designed office furniture. As a research driven company, we are constantly evaluating and updating product options to accommodate changes in technology.

MAiSPACE workstations are designed to allow for maximum height variation and superior strength, and engineered for maximum sit-to-stand flexibility. Your workstations can also be configured to fit any office work environment and calibrated to any individual employee. Reconfiguration is no hassle; it is accomplished quickly and easily without having to clear your desk or even call for assistance.

Choosing the right ergonomic office chair is also a very important decision. At MAiSPACE, we are completely focused on employee safety and health concerns. Our ergonomic office chair, MAiCHAIR, is the best the ergonomic office furniture industry has to offer in terms of quality, comfort and environmental responsibility ... and price.

Ergonomic chairs come in various forms and styles. However, they all have one important point in common – they promote a healthy posture. Main features of ergonomic office chairs are the following: 1) the seat cushion should have a generous layer of foam, or a memory foam for superior comfort and allow your feet to rest flat on the floor or footrest, 2) an ergonomic chair should have a lumbar support that is height

adjustable, an adjustment that allows the user to recline at least 15 degrees from the vertical, and a device enabling it to move forward and backward, 3) an ergonomic desk chair should have the same, plus height- and/or width-adjustable armrests that are soft and should allow your shoulders to relax and your elbows to stay close to your body.

MAiCHAIR, MAiSPACE's fully ergonomic seating line combines all these requirements in one revolutionary chair. MAiCHAIR's engineered, flexible plastic backrest conforms to the natural curvature of the spine and provides critical support in the lumbar region. A lumbar support that is height adjustable is critical so it can be appropriately placed to fit the lower back. MAiCHAIR's uniquely contoured seat pan improves blood flow and reduces discomfort by distributing weight more evenly.

MAiCHAIR's other adjustable features include a 5-position headrest, adjustable arms, and a lightweight five-star base. The state of the art syncro-tilt provides adjustable tension resistance, pneumatic seat height adjustment and multi position tilt-lock control in one easy to adjust mechanism. Unique to this dynamic, cost effective chair, is that the seat and back cushions are designed with special fasteners that allow for quick and easy removal permitting replacement without tools. The contoured seat cushion and rounded waterfall edge improves blood flow, and the syncro-tilt mechanism helps maintain the correct posture through a full range of motion.

At MAiSPACE, we are committed to protecting the environment and the health and safety of our employees and community. We strive to sell products that use recycled materials and environmentally sound manufacturing methods. Our innovative products meet ergonomics codes and highest industry standards. These ergonomic products are the essential elements of a work space that encourages productivity and ensures comfort.
